ONLINE TRAINING ON OPERATIONS MANAGEMENT IN HOSPITAL SERVICES

DATE & TIME: 22-24 September 2021 from 10.00 am

For more information please write to us on fdp@escihyd.org

INTRODUCTION:

- Management of hospitals is a synergy between science and art. The rapid advances in science and technology have caused a paradigm shift in medical services in the past three decades. Since health care has been declared as industry, leaders of modern medical practices have been trying to innovate new methodology to provide better health services. Predictive, preventive and promotive methods as well as latest treatment and rehabilitative practices should be not only available, but they must be accessible, affordable and qualitative even for the common person.
- The Doctor as manager has to take the hospital from charitable non-profit hospital to for –profit Corporate Hospital. The Doctor as Manager i.e. ADMINISTRATOR plays a vital role in saving the lives, without having the scalpel in hand provided he has mastered his skills & practiced it. The clinicians strive to keep the blood flowing & the heart beating, the ADMINISTRATOR is doing his job in keeping the hospital alive & healthy.
- The Operations Management with its multi dimensions is of immense help in providing constant effective hospital services by providing state of the art biomedical equipments & the concept of Information Technology. The basic mantra is how to instill confidence of quality health care service to the patients.
